Hi Mindy and Whitney,

So I glanced at this which Alexis and Kavita pulled together and although a little long there are really only three things that I'm not sure why we are asserting here and we may want to consider softening..

1)

2)

Ex. 5 Deliberative Process (DP)

3)

Lastly, There is a lot that seems oddly phrased with double negatives in sentences etc. and a few technical edits that need to be made but overall really good as I'd expect from these two.

- Kathy

Subject: Check-in: First comment summary/response

Mindy – Before we start routing this, here is the comment summary and response for the larger category of the Agency's policy on ESA consultation. This is the check-in promised to make sure we're on the right path as far as rolling

up both the comment summary and responses into longer narratives rather than breaking them up into distinct comment/response sub-topics.

This would be one of approximately 12 topics in the Response to Comment document. (I'm not sure of the final number because it looks like we'll be able to consolidate considerably from the original 18, we just haven't had time to review everything that came in late last night.)
